SUMMARY

Computer Science and Engineering student at American International University-Bangladesh with a strong interest in IT, software development, and software quality assurance. Skilled in problem-solving, teamwork, and adapting to new technologies, with hands-on experience in technical and academic projects. Motivated to learn from industry professionals, apply academic knowledge in real-world environments, and contribute effectively through dedication, communication, and continuous improvement.

PROJECTS

Personal Finance Tracker (Full-Stack) 2025

- Built responsive multi-page UI with HTML, CSS and JavaScript.
- Implemented core features: income recording, budget/savings, bill reminders, export and activity logs.
- Simple PHP backend with session/cookie-based auth and page protection (lightweight controller logic).

Iris Perfumes (Full-Stack) 2025

- Developed scalable REST API with Nest.js, TypeORM(PostgreSQL).
- Frontend: Built responsive e-commerce storefront with Next.js (App Router) + TypeScript and Tailwind CSS — product catalog, dynamic product pages, product cards, navbar/footer, and login/register UIs (products served from local JSON; client-side auth simulated).

URL Shortener (Full-Stack) 2026

- Frontend: Built responsive webpage with React + TypeScript for creating short URLs, data table, client routing and Axios integration to call the API; styled with Tailwind/CSS.
- Backend: Implemented REST API with Node.js, Express and TypeScript; MongoDB + Mongoose for storage, nanoid-based short ID generation, endpoints to create/list/get/delete short URLs and redirect with click tracking.
